Information about Copyrighted Content

Some instruments administered for studies archived with ICPSR may contain in whole or substantially in part contents from copyrighted instruments. Reproductions of the instruments are provided as documentation for the analysis of the data associated with this collection. Restrictions on "fair use" apply to all copyrighted content. More information about the reproduction of copyrighted works by educators and librarians is available from the United States Copyright Office.

NOTICE WARNING CONCERNING COPYRIGHT RESTRICTIONS

The copyright law of the United States (Title 17, United States Code) governs the making of photocopies or other reproductions of copyrighted material. Under certain conditions specified in the law, libraries and archives are authorized to furnish a photocopy or other reproduction. One of these specified conditions is that the photocopy or reproduction is not to be "used for any purpose other than private study, scholarship, or research." If a user makes a request for, or later uses, a photocopy or reproduction for purposes in excess of "fair use," that user may be liable for copyright infringement.

ICPSR Processing Notes for #39419

American Communities Project, United States, 2023-2024

DS1: Public-Use ACP Year 1-2023 Dataset

1. **Confidentiality/Disclosure Risk:** In order to protect respondent anonymity and prevent disclosure risk, ICPSR replaced confidential information in the variable **D40** with "MASKED BY ICPSR."
2. **Undocumented Codes:** The variables **Q9_1**, **SURVEY_VERSION**, **GRP_TYPE_NO**, **QFLAG**, **DOV_SAMPLE**, **SSTNO**, **XPARENT**, and **XPARTY4** contain undocumented values which ICPSR has labeled "Undocumented Code." No additional information was provided.
3. **Variable Differences:** Several variables appear in the dataset but are not present in the P.I. documentation. No additional information was provided.
4. **Qualitative Data File:** The variable **Q2M10** was exported to a comma delimited (CSV) file which is available for download and can be linked to the dataset via the **CASEID** variable.
5. **Stata Limitations:**
 - a. Due to Stata limitations, the variable **Q9_1** does not contain a value label for the non-integer value ".1" within the Stata files.
 - b. The responses to variable **Q2M10** are truncated in the Stata files due to Stata limitations.
6. **Additional Information:** For additional information on the American Communities Project, please visit the [American Communities Project](#) website.

Variable Description and Frequencies

Note: Frequencies displayed for the variables are not weighted. They are purely descriptive and may not be representative of the study population. Please review any sampling or weighting information available with the study.

Summary statistics (minimum, maximum, mean, median, and standard deviation) may not be available for every variable in the codebook. Conversely, a listing of frequencies in table format may not be present for every variable in the codebook either. However, all variables in the dataset are present and display sufficient information about each variable. These decisions are made intentionally and are at the discretion of the archive producing this codebook.
